

Design Database Schema

Project: MERN Stack Employee Management System

STUDENT NAME Bhanu Sharma	ENROLLMENT NUMBER O24MCA112292
COURSE MCA Full Stack Development	UNIVERSITY Chandigarh University
GUIDE / MENTOR Alok Srivastva	ACADEMIC YEAR 2024-2026

Milestone Progress

MILESTONE Design Database Schema	PROGRESS COMPLETE	ACTIONS / STATUS Marked as Complete
--	-----------------------------	---

Objective

Design the MongoDB database structure required to store users, employees, and activity logs for the employee management system.

Work Completed

- Created a User schema for account details, email, password hash, role, department, and timestamps.
- Created an Employee schema for name, email, phone, department, job title, status, createdBy, and timestamps.
- Created an ActivityLog schema to track important actions such as employee creation, updates, deletion, imports, and role changes.
- Used Mongoose models to keep validation and database structure consistent across the backend.

Evidence / Files

server/src/models/User.js
server/src/models/Employee.js
server/src/models/ActivityLog.js

Outcome

The database schema milestone is complete. The application has structured MongoDB collections for authentication, employee records, and system activity tracking.
